

EQUIA Forte® Technique Guide

1. Occlusal caries.

2. Cavity preparation.

3. Apply CAVITY CONDITIONER (10 sec.) or DENTIN CONDITIONER (20 sec.)

4. Rinse, dry; do not desiccate.

5. EQUIA Forte® Fil is placed in one increment.

6. Shape and contour within 60 sec.

7. Final finish under water spray after 2min 30 sec.*

8. Brush-apply a single layer of EQUIA Forte® Coat.

9. Light-cure for 20 sec.

10. Completed restoration.

* During the first 2 min 30 sec. from start of mix extra care should be taken to avoid moisture contamination or drying-out. In case this cannot be guaranteed, immediately apply EQUIA Forte® Coat and light cure.
