GC FujiCEM
Reinforced glass ionomer luting cement

Literature (as of 12 September, 2007)

2. Scellement de prothèse fixée : intérêt du ciment verre ionomère renforcé à la résine ; J.Lecerf, S.Auffret ; Synergie prothétique avril 2001 – vol.3, n°2
5. Flexural Strength of Fourteen Cements; from G. Baudin II and J.O. Burgess, LSUHSC School of Dentistry, USA; IADR 2002 San Diego, Abstract 1211
8. Pulpal response to three resin cements for resin inlay restorations, M.Otsuki, H. Sonoda, Y.Kitasako, J.Tagami (Tokyo Med. & Dent. Univ., Dept. of Operative Dentistry, Tokyo, Japan), 78th General Session of the IADR, April 5-8, 2000, Washington DC, USA
10. Dentin shear bond strength of various luting cements; A. Piwowarczyk, H.-Ch. Lauer, J.A. Sorensen (Johann Wolfgang Goethe University, Frankfurt, Germany; OH & SU Portland, OR, USA); Abstract 215 - EADR Cardiff, September 2002
12. Fracture strength of composite and all-ceramic CAD-CAM Crowns; A. Attia, M. Kern; Abstract 1356 - 81st General Session of the IADR, 2003, Göteborg, Sweden
13. Bond strengths of resin luting materials to crown and root dentin; R. Walter, P.A. Miguez and P.N.R. Pereira; Abstract 1463 - 81st General Session of the IADR, 2003, Göteborg, Sweden
15. In vitro wear and bond strength to metal after cyclic loading of different luting agents; R.R. Braga; Abstract 2609 - 81st General Session of the IADR, 2003, Göteborg, Sweden
17. Marginal and flexural integrity of three classes of luting cement, with early finishing and water storage; M. Irie, K. Suzuki, D.C. Watts; Dental Materials (2004) 20, 3-11*
